

MASSIVE TEE MADE WITH MORE THAN 14 TONS OF STEEL

Thompson Pipe Group Manufactures Unique Fittings

QUICK FACTS

As a complement to pipe, Thompson Pipe Group manufactures all required project fittings. This 120" x 96" with a 120" x 108" eccentric reducer was produced for the City of Houston. To meet the region's growing water demand, the city expanded the Northeast Water Purification Plant. As an integral part of the expansion, this tee was designed for 150 psi working pressure and was manufactured with 0.531" steel and a 2" thick crotch plate outlet reinforcement. In accordance with AWWA standards, it has a $\frac{3}{4}$ " cement mortar lining and 25 mils of low solvent aromatic polyurethane. Produced in the Thompson Pipe Group manufacturing facility in Grand Prairie, Texas, this tee required almost 15 tons of steel.
