Emergency Pipes and Parts

Services

- **Tapping** Hot, Dry & Emergency Tapping Products – Tapping sleeves, and related components for water and sewer applications.
- **Emergency Pipeline Closure Products** – Reliable closure solutions designed to support urgent pipeline repairs and maintenance.
- **Third-Party Coordination & Technical Support** – We work closely with contractors, engineers, and project teams to help ensure the right solution is specified and supplied.
- **Same-Day Shipping Available** – Select inventory is stocked and ready for rapid shipment.
- **Custom-Engineered Solutions** – Our engineering team can assist with the design and manufacture of specialized fittings and pipe products.
- **Field Measurement Support** – On-site measurements and technical assistance may be available based on project requirements and location.
- **Installation Assistance Available Through Trusted Partners** – For select projects, we can help connect customers with qualified service providers when available.

Rehabilitation

Need help with a rehabilitation or sliplining project?

Visit our website by scanning the QR code or mail trenchless@one-tpg.com

Pipeline Inspection

Visual pipeline inspections identify joint types, damage, and repair options.

- Joint inspection
- Concrete pipe mortar inspection
- Examination of prestressing wires
- Internal inspection during line shutdowns
- Sampling of lining, joints and steel
- A comprehensive report of the inspection findings

Historical Records

We don't guess, we know

From the Roaring Twenties to the present day, Thompson Pipe Group maintains a database of scanned and native electronic files for nearly 80% of the country's large-diameter concrete pressure pipe installations. Layout and detail drawings, as well as specification sheets, are available for Thompson projects. Job files are on hand for nearly a dozen manufacturers.

Engineering Services

Our certified engineers are active in professional organizations:

- American Concrete Pressure Pipe Association
- American Society of Civil Engineers
- ASTM International
- American Water Works Association
- Steel Plate Fabricators Association

They have unparalleled knowledge in pressure pipe design, installation and maintenance. Custom solutions are designed for each unique demand.

Certified by Lloyd's Register to ACPPA and SPFA quality programs

Thompson Pipe Group manufactures and repairs:

- Bar-Wrapped Pipe (BWP)
- Fiberglass Reinforced Plastic (FRP)
- Fiberglass Reinforced Plastic Mortar (FRPM)
- Prestressed Concrete Cylinder Pipe (PCCP/C301)
- Prestressed Concrete Embedded Cylinder Pipe
- Polymer pipe
- Reinforced Concrete Pipe (CRCP)
- Steel Pipe (S-200)

Don't see your pipe? Pipes can have multiple names. Call us and we'll discuss a solution.
